Research about wearable tech																								·		
Research about mutual language																										
Research usage of personal inf in SNS																										
Research of color association, effects																										
Design of the shoe&leds																										
Blinking led in plexiglass with clicking status by using Arduino and Processing for prototype																										
Interface design ideas																										
Trying interface design by Processing																										
Decision about model of shoe																										
Material research																										
Choosing a model of shoe																										
carving the bottom of shoe where arduino will be placed																										
Cutting plexiglass and testing the reflection of rgb leds with different colors																										
Making a model of heel from ceramic putting leds, cables and plexiglass and testing																										
Choosing the best tyoe of Arduino for project- Lilypad																										
Putting led into heels																										
Connecting leds with ardiuno and interface																										
Testing and making corrections																										
Presentation
