petsclusive 

Hi, I'm Burcu

My project will be based on creating a new non-profit brand to provide food and shelter to shelter animals in Turkey and create awareness people about those animals by selling designed products in a shop.

This project's main part is creating a designed products shop brand and it's corporate identity. This shop is not going to be like a pet shop. More, it is going to be a shop that sells designed products. Designers who wants be a part of my project design products related with animals such as a clothes with dog pattern, key holder shaped dog etc.

LIVING SPACE

This type of workshop is our fundamental type of workshops that take place 4 times in a year. Each year we change meeting points but 2 of them take place in Asian side and the rest 2 take place European side. This workshop is allow people to meet in determined place and build shelters for street animals. Although the principle aim of the project is providing comfortable and warm living space for street animals, raising awareness of people about team works is also in our aims.

Participant of this workshops don't need to bring their tools with themselves. Our company provide basic tools for building shelters. If participants want to add their personal pleasures while decorating shelters, they can bring their own materials too. But they should not forget that, the principle is protect animals from cold and rain.

FEEDING UNITS

Each Sunday we are meeting for creating and designing food cups for animals. Than participants distribute cups with leftovers of their food to those shelters. Some of the designed cups from our participants are going to sold in our shop.

This workshop has 2 phases and much more longer than others. For this workshop we need 1 year at least.

First phase, 'dogs and children'

Our company has a training units in Taksim and Kadıköy .Our aim is getting together problematic dogs and children in this phase. People bring their children and leave them there with dogs and educators at the weekends. Each children has one dog friend there. They spend time together; washing,feeding,playing,training etc. At the end of the year, children will have lots of experiences about communicating and sharing with dogs and also they will gain animal love at the end. This love and the time period that they share together will influence problematic dogs in a good way too.

Second phase,'dogs and couples'

Doas which are already trained by children in
